Dear Residents of Peasmarsh

I am writing to warn you that this planet is changing and you need to make sure that you go litter picking. Today my school went litter picking and it was horrendous how much rubbish we found.

I would also like to say that animals are dying from litter. When my class Bumble Bees went we found four kg of litter. I was shocked the bags were half way full. Hedgehogs can get stuck in pickles and Jam bottles.

To conclude I would like to be a "Agent of change". I pledge not to chuck or throw or drop rubbish on the floor I will look after animals.
